🚀 Projects

word-tutorial-project

Word Auto-Table Tutorial – An interactive web-based tutorial for learning how to create automatic tables of contents, figures, and lists in Microsoft Word. Built with pure HTML and CSS as a project for the Computer Workshop course.

Library Management System

A comprehensive, file-based Library Management System developed in Python. Implements a multi-role environment (Admin, Librarian, and Member) with persistent data storage using JSON files.

OpenLibrary Books Fetcher

A Python script that fetches 50 books from the OpenLibrary API, filters books published after the year 2000, and saves the results in a CSV file.
